Blindspot

See what your sales data is hiding.

The AI analyst for small online stores

Live demo · Your store's export · Claude AI

blindspot-8lr1.onrender.com

INSPIRATION

The data knew. Nobody asked it.

I kept seeing the same story: sales looked fine, while the **best customers** quietly **walked away.**

- Who stopped coming back?
- What is quietly dying?
- What do we fix first?

> Every chart said growing.
> None said going.

Big companies have data teams.
Small shops have a hunch.

So I built the analyst they can't afford to hire.

THE PROBLEM

Small shops fly blind.

Totals

hide the problems

Sales look fine while customers quietly leave

$70K+

a year for an analyst

Big companies pay data teams. Small shops can't.

What,

not why

Dashboards show numbers. You still have to find the problem.

THE REAL PROBLEM

What you can't see can sink you.

1 in 5

new businesses close in year one

About half are gone by year five

U.S. Bureau of Labor Statistics

5–25×

more to win a customer than keep one

Losing loyal buyers is the costliest leak

Harvard Business Review

+5%

customers kept → 25–95% more profit

Small fixes, huge payoff

Bain & Company

The warning signs are already in your sales. Nobody is reading them.

REAL UK ONLINE SHOP · FULL 2-YEAR DATASET · 1M+ SALES LINES

Totals lie.

+5%
Total sales, last 90 days vs a year earlier

−51%
A best-seller, same 90 days (measured)

42
best customers went quiet
≈ £300K a year (3+ orders, none in 90 days)

49 → 40%
New customers reordering within 90 days

Source: UCI Online Retail II (CC BY 4.0), full dataset; re-checked in Python, 7/7 match

The live demo uses a 25% customer sample, so its figures differ

Your totals tell you what. Blindspot shows you where.

Which customers

Which products

How much money

THE SOLUTION

Blindspot finds it in seconds.

Upload

Supported exports or Shopify, live

Clean

Duplicates, returns, cancelled orders

Find

Products, countries, best customers

Prove

Statistics, not guesses

Fix

Ranked by money, with a plan

WHAT YOU GET · REAL FINDINGS FROM THE UK SHOP

Tested · p = 0.002 — 51% → 42%

Fewer new customers come back for a second order

Rule of thumb — £94K/yr

10 best customers stopped ordering

Rule of thumb — £36K

23 products went to zero sales

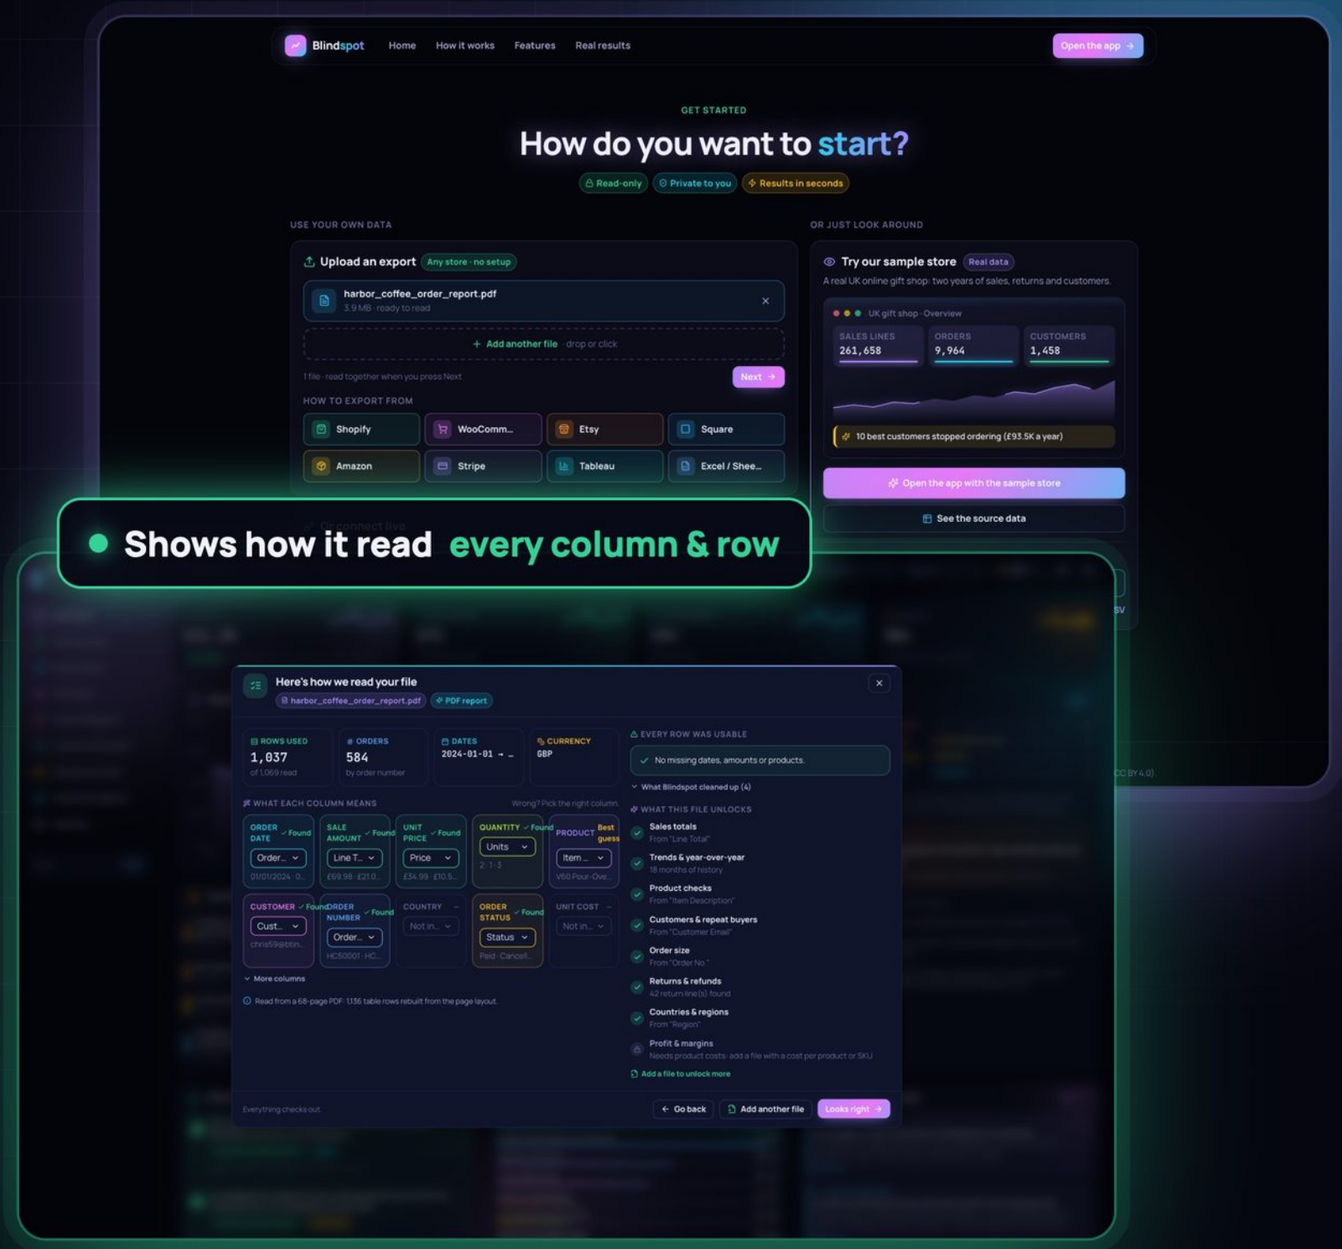

STEP 1 · UPLOAD

Your export, as it is.

CSV · Excel · PDF · Numbers

Shopify · WooCommerce · Etsy · Amazon · Square · Stripe · Tableau · Spreadsheets

Headers tested in 8 languages Fecha · Datum · 日付

STEP 2 · FIND

Problems ranked by money at stake.

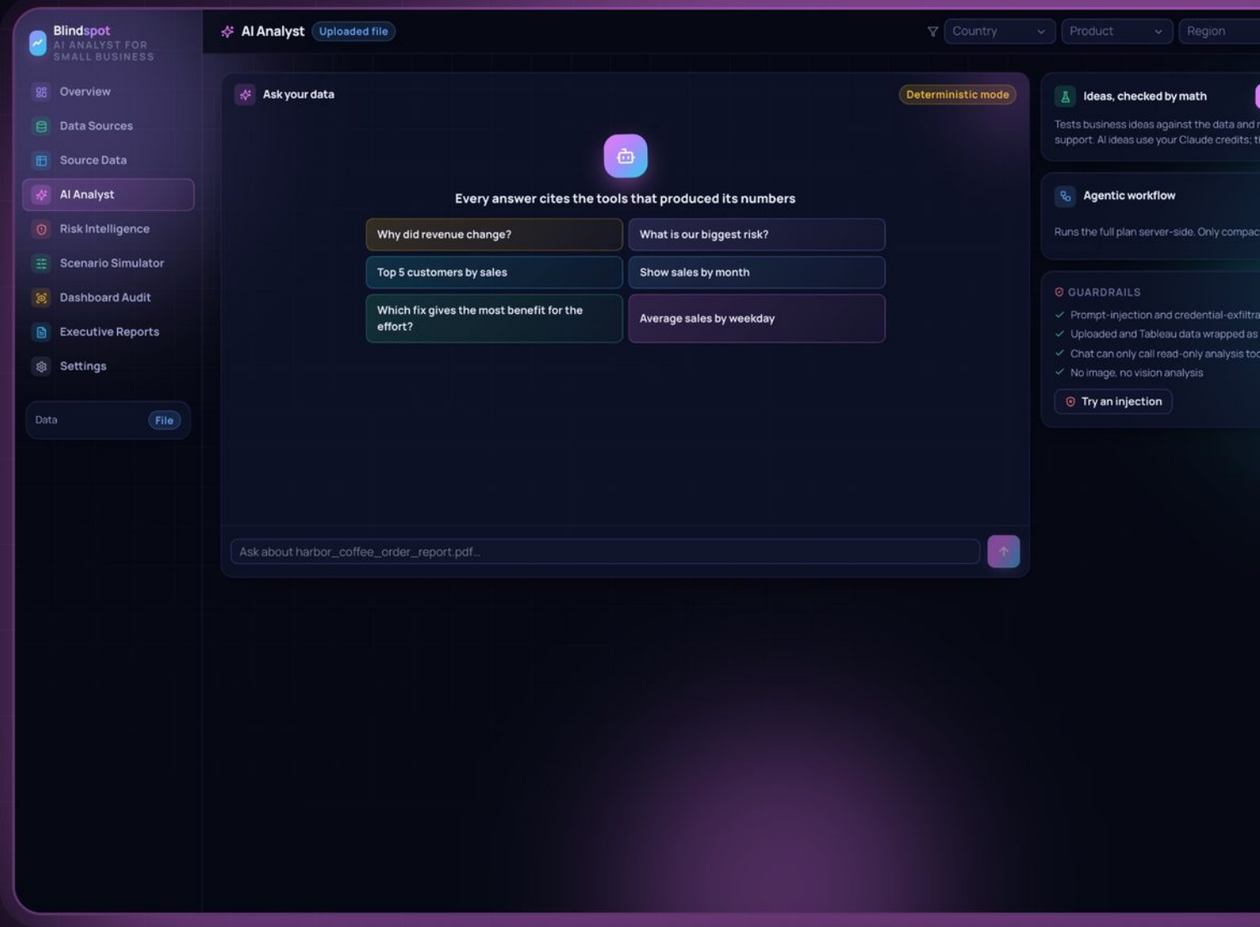

- Sales vs same months last year
- Top problems + £ at stake
- Health score 0-100
- Fix this first

HOW IT USES AI

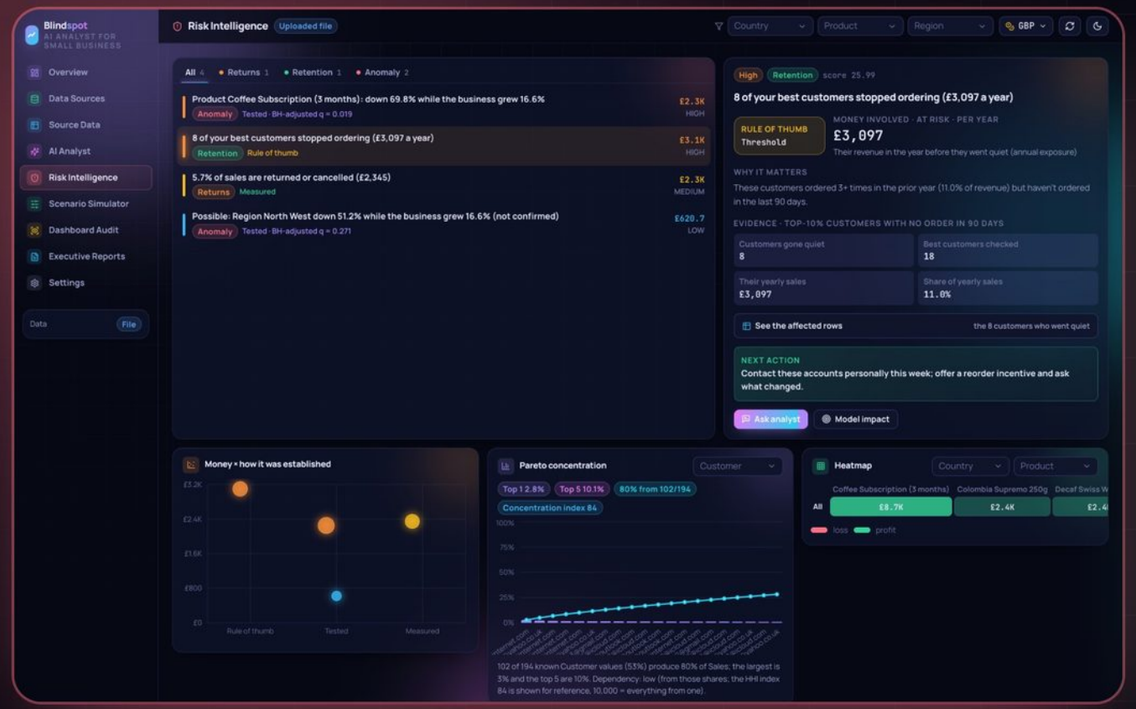

AI suggests. Math checks.

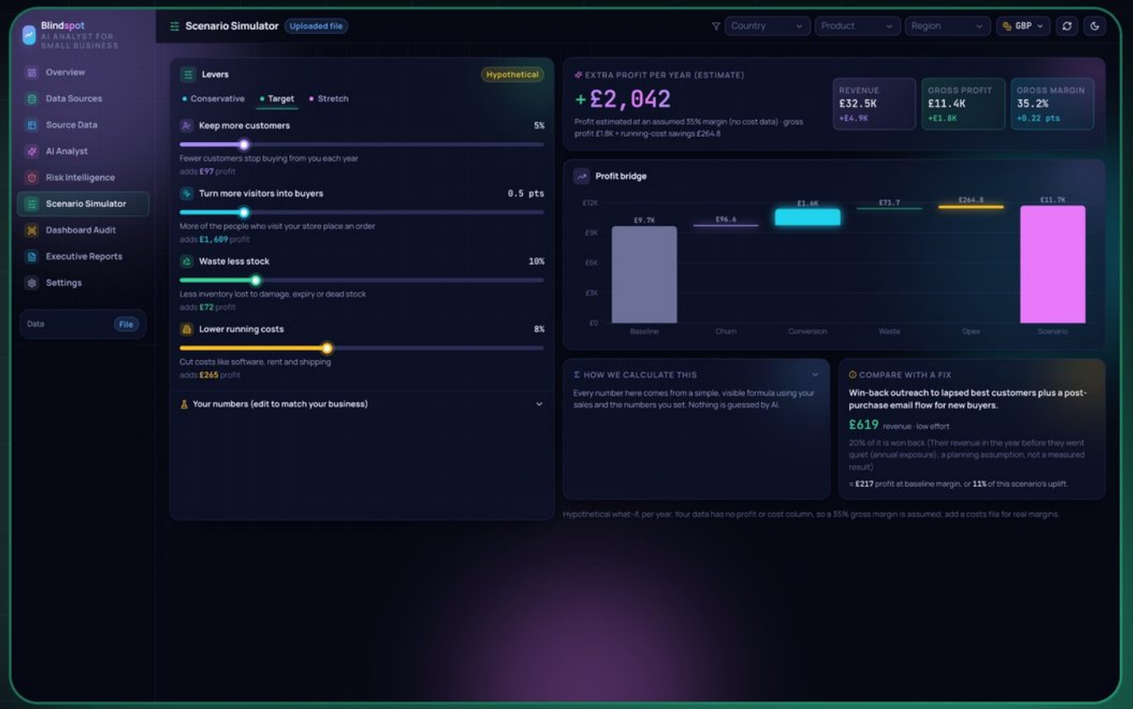

- Ask in plain English
- Claude calls 15 read-only tools in chat
- Proposes new business ideas
- Every idea tested with statistics
- Numbers come from tools, not the model

STEP 3 · FIX

Decide what to fix first.

Risk map

Every problem by money × how it was proven

What-if simulator

Profit from each fix: conservative → stretch

One-page report 10 topics checked · roadmap: 30 / 90 / 180 days · PDF or Markdown

TECHNICAL DECISIONS

How it's built.

Browser
React · TypeScript
Excel & PDF read here

Server
Node.js on Render
private per visitor

Math engine
Statistics · cleaning
no AI needed

Claude AI
34 typed tools · 15 in chat · MCP

Math separate from AI
Fast, free, same answer every time

Year-over-year
Holiday rushes can't fake growth

Flexible file reader
7 platform layouts, 8 languages, text PDFs

Fits a free 512 MB server
Pre-cleaned data, memory budget

34 typed tools · Every input validated (Zod) · MCP server · 187 tests · 0 known vulnerabilities

EVIDENCE

Proof, not promises.

7/7

numbers match
an independent Python check

187

automated tests
all passing

≤5¢

1,500-order files in 5 platform layouts

1.07M rows
Read + clean 34 s, analysis 5 s (2020 Intel i5 laptop). An 800-row store export: 0.1 s. Public site: up to 100K rows per upload.

Real data
UCI Online Retail II

PRIVACY · SECURITY · LICENSING · RESPONSIBLE AI

Private. Safe. Responsible.

Read-only

Shopify access can't change your store. Keys used once, never stored.

Private

Each visitor's data is theirs alone and isn't kept.

AI checked

The AI doesn't do the math: numbers come from tested tools, and its ideas are checked with statistics first.

Credited

Data CC BY 4.0. Open source credited. AI-assisted coding disclosed.

Only read_orders · read_products · read_inventory

Secrets redacted from logs

Prompt-injection screening

WHAT WAS HARD

Challenges & fixes.

Messy real data
An 80,995-unit mistaken order → reversed orders removed

Holidays faked growth
→ compare with the same months last year

PDFs don’t store tables
→ rebuilt rows from where words sit on the page

The AI caught my bugs
→ returns counted two ways, fixed & re-checked

A free server with 512 MB
→ pre-cleaned data, a memory budget, tested with 6 big uploads in a row

WHAT I LEARNED

01

AI is best when it's checked.

Every AI idea goes through a statistics test

02

Real data beats demo data.

Real sales exposed bugs a demo never would

03

Showing your work builds trust.

Line numbers, column report, Source Data page

04

Test with the ugliest files.

29 strange file shapes are now permanent tests

TEAM

Solo builder

Builder of the analyst small shops can't afford to hire

Product · Design · Data · Testing

TOOLS USED

React · TypeScript · Node.js · Claude · Claude Code · MCP · Shopify API · pdf.js · SheetJS · Recharts · Framer Motion · Tailwind · Render · GitHub · Vitest · Zod

187 tests

7 platforms read

ROADMAP

What's next.

NEXT

More live connectors

WooCommerce, Square and Stripe, straight from the store

NEXT

Weekly alerts

New problems emailed the week they start

LATER

Compare with similar stores

See where you're ahead or behind, privately

LATER

Sales forecasts

Next month's sales, checked against what really happens

THE GOAL

Every small shop gets the analyst big companies have.

Stop guessing.
Start knowing.

See it. Prove it. Fix it.

Every sale tells a story. **Blindspot reads them all.**

READY TODAY

Shopify, live
Connect read-only in a minute
